Type: WHM-6R Warhammer
Tonnage: 70 Tons
Engine: 280 VOX
Weapons: Two Donal PPCs
Two Martell Medium Lasers
Two Magna Small Lasers
Two SperryBrowning Machine Guns
Holly Short Range Missile Pack (6)

Again, you're first out of the DropShip. Scanning across the burning desert, you can see no sign of the enemy. Can this landing really be unopposed?
No! There, on the horizon! The unmistakable dust cloud of approaching 'Mechs.
Powering up, you move out.
Can your awesome firepower defeat these unknown foes?

In the 31st Century warfare is common. But whatever world the battle is on, the battlefield is dominated by one weapon: the BattleMech. Heavily armed and armored, these vaguely humanoid fighting machines are virtually unstoppable—except by another 'Mech. The men and women who pilot them, the MechWarriors, are the elite of a military society.

Now you can find out what it's like to pilot a 'Mech—from the inside! Each page of these books gives you the view from the cockpit of your 'Mech as you face off against another of these awesome machines. The controls are in your hands; the choices are yours!

NOTE:
This book by itself is not a complete game. You must have at least one other book in the BATTLETECH® series before you can start to play.
This booklet represents one character, or 'Mech, in the BattleTech® series of science fiction combat games. Each 'Mech in this series can interact with every other; each has strengths and weaknesses which you will discover as you and your friends collect them.

The Booklet—Each page of the booklet has a View Screen (odd-number) and a Console (even number). The Console has three Displays showing your movement options, your opponent’s movement restrictions, and any critical hits you might score upon your opponent. Results of your moves are shown in the View Screen.

The 'Mech Stat Card—On the front of the Stat Card is a list of maneuvers, and your 'Mech’s stats. Next to the column listing the maneuvers are columns showing which Console to use when doing that maneuver, the heat it generates, and the damage you can do to your opponent. On the back of the Stat Card are the Multi-player and Campaign rules.

The Pilot Card—The Pilot Card has spaces to record your pilot’s name, rank, experience, etc., as well as skill modifiers and the contents of his stockpile. On the back, is the continuation of the Campaign rules.

How to Play
Each player must have a booklet and a 'Mech Stat Card to play. You and your opponent both do the following steps simultaneously:

1) Exchange booklets with your opponent, but keep your own 'Mech Stat Card.
2) Open the booklet to View Screen 49. You now see your opponent at Long Range as shown by the Range/Action Display above the View Screen. Just beneath the View Screen is the Status Display with instructions for your opponent’s next maneuver. Read the instructions to your opponent now (e.g., ‘Do only Long Range next turn’)
3) Use your Stat Card to choose your maneuver (obeying the instructions just given to you by your opponent in step 2, above) and turn to the Console number listed next to the maneuver. This will always be an even number.
4) Increase your Current Heat level by the amount shown next to the maneuver under ‘HEAT’ on the Stat Card. Note: If your Heat level is equal to or greater than your 'Mech's Shutdown number, your 'Mech will overheat and shut down at the end of this turn.
5) If the maneuver you just chose uses ammunition, deduct the appropriate number from your Current Ammunition. When any weapon’s Current Ammunition reaches zero, you may no longer use that weapon. (You may choose to ignore ammunition restrictions, if both players agree.)
6) Tell your opponent the number of the Console display you are now on. This will always be an even number.
7) On your Console Display, find the even number your opponent has just given you in step 6, above. Next to it is an odd number, sometimes with a letter after it. Remember the letter, if any, and turn to the odd-numbered View Screen listed next to it. This View Screen will show either your opponent’s maneuver or the damage you have done to him. Note: It will not show if you have been hit. That will only show in the booklet your opponent is using.
Tell your opponent the View Screen you are now on.
If you choose to ‘Bail Out,’ announce it now.
8) If the word ‘SCORE’ appears in the View Screen, you have hit your opponent. Add the number listed below ‘SCORE’ to the damage modifier from your Stat Card for the maneuver you just did. If the result is greater than zero, you have damaged your opponent. Tell your opponent to subtract that amount of damage from his Current Armor Points.

E[5]: PPC: "Do no Dual PPC. Second result equals do no PPC."
F[4]/G[4]: Left/Right Arm: "Do no Push."
H[5]: PPC: "+1 Heat to all PPC shots."

50—39  54—39  58—43  62—49
52—47  56—57  60—29  64—11
9) If you damaged your opponent in step 8, above, you may have caused a Critical Hit, (see below). If you did cause a Critical Hit, read the critical damage listed to your opponent.

Note: The Critical Damage Display is normally blank. It contains data only when your opponent has been hit.

10) If your opponent's Current Armor Point total is now zero or less, his 'Mech is now inoperative and you have won. Otherwise, read your opponent the instructions on the Status Display just beneath the View Screen and repeat steps 3 through 10.

HEAT—Virtually every move you make with your 'Mech generates heat. Your 'Mech starts the game with a Current Heat level of 0. Every time you choose a maneuver, you must record the change in your Current Heat level caused by that maneuver. There are certain moves on the Stat Card with negative Heat numbers. These moves subtract heat from your Current Heat level and can be used to cool down your 'Mech. At the end of any turn in which your Current Heat is equal to or greater than your Shutdown Number, your 'Mech automatically shuts down. You may only do the moves ‘Cool Off’ or ‘Duck’ until your Heat level is 15 or less. Your Heat level may never go below zero.

For every turn your Heat level equals or exceeds 28, you must lose one Ammunition Point (your choice) and take 2 points of armor damage as your ammo starts to explode. This does not apply if you are totally out of ammunition.

AMMUNITION—Certain weapons require ammunition to use and are marked on the Stat Card. The initial ammunition supply for each weapon is also marked on the Stat Card. Every time you fire a weapon which requires ammunition you must mark off one Ammunition Point on the Stat Card. A weapon with zero ammunition points may not be used. Ammunition Points may never go below zero. Your 'Mech always starts the game with a full ammunition load.

Exception: See Campaign Rules. Both players may choose to ignore ammunition restrictions if they agree beforehand.

CRITICAL HITS—Some Console results have letters after them (i.e., -13B, -27K, etc.). This letter is the potential Critical Hit for that maneuver result. Whenever you end up on a View Screen showing your opponent being hit, include the following substeps in step 9:

9a) Look on the Critical Damage Display for the letter of the maneuver you just did. Next to the letter will be a number in brackets (i.e., [4]).

9b) If the modified damage you did to your opponent in step 8, above, is equal to or greater than the number in brackets, you have caused a Critical Hit.

9c) Read the phrase telling exactly what the Critical Hit is to your opponent. The effects of a Critical Hit take place immediately and stay in effect for the entire game. Multiple Critical Hits to the same location are cumulative. I.e., two hits to your laser, each causing “-1 to all Laser attacks,” means you now fire your laser at -2 to any Scores.

Often similar Critical Hits are grouped together. For example:

This means: If your letter is “A” and you did at least 2 points of damage, after modifiers, to your opponent—or—if your letter is “B” and you did at least 4 points of modified damage, then you have caused him the Critical Hit: “Add +1 to all Heat costs.” Note: If your letter was “B” but your modified damage was only 3 or less, you did not cause a Critical Hit.

MUTUAL DESTRUCTION—A 'Mech which overheat but still has Armor Points beats a 'Mech with no Armor Points. If both 'Mechs go below zero Armor Points on the same turn, no one wins.

ESCAPE—You may break off combat and escape if you can maneuver to page 29 (Long Range, Jumping Back) from any long range page. Simply announce, “Escaping!” and the game is over. Your opponent receives credit for ½ victory if you successfully escape.
Multi-Player Rules

For multi-player combats, arrange two sides. Players on the side with the fewer members each pick one opponent. Then, the extra players on the larger side each join any battle they choose. Note: It is permissible for more than one extra player to join a battle, i.e., three against one, four against one, etc. Play normally including the following rules:

1) If you are fighting more than one opponent you may find yourself at different ranges with each. Select a single opponent to attack and choose a maneuver from the appropriate range.

2) Each maneuver on the Stat Card has Conversion numbers in addition to the Console numbers listed next to it. To resolve the results of your opponents’ actions at other ranges, read them the Conversion numbers at the far right of your Stat Card for the appropriate maneuver and ranges. Turn to the Console page for these numbers and resolve each of the combatants.

3) If you have Scored against more than one opponent, you may divide your damage modifier among those opponents in any manner you wish. Note: You can not apply the full modifier to each of your opponents. (You may apply it to any one opponent if you choose.)

4) If you defeat your opponent(s) and there are still battles going on, you may choose to join one. If you join against one opponent, play continues as a normal multi-player battle. If you join against two or more opponents, you must choose any one opponent who must then leave his attack for a one-on-one against you.

5) If you receive conflicting instructions from your opponents, do only the most restricting instruction.

6) Use only the Heat from the original move you chose, not from either of the conversion maneuvers.

Note: The format for multi-player battles is always one vs. any number of opponents. A 2 vs. 2 battle is not possible but must break into two 1 vs. 1 battles. Only after you win can you join your partner in a two-on-one against the remaining opponent.

Campaign Rules

PILOT IMPROVEMENT—You may improve your character’s skill with Experience. Experience is figured by enemy tonnage destroyed.

Each time you defeat an opponent, add the tonnage of the enemy 'Mech to your Experience total. (New pilots start with 0 Experience.) For every 250 tons of enemy 'Mechs you defeat, you may increase the damage modifier for any one category shown on the Pilot Card. Each category is defined on the Stat Card by a Roman numeral.

This increase affects all the moves on the Stat Card in the category you choose and stays with your pilot, not with the 'Mech. The pilot retains any increases when moving to a new 'Mech.

Increases in one category may not be used in any other category. I.e., a +1 modifier in the PPC category has no effect on the Laser or Missile categories, and if the pilot moves to a 'Mech without a PPC, the bonus can not be used (although he retains it in case he ever goes back to a 'Mech with a PPC.) Note: Some categories cover more than one range.

A pilot with +5 or better in a category may choose to ignore the first Critical Hit which affects that category.

'MECH DETERIORATION—Each time you start a new game with the same 'Mech, subtract one from the 'Mech’s Shutdown number. After ten games, you may acquire a new 'Mech with a full Shutdown limit at a cost in Experience Points equal to the cost printed on the front of the 'Mech's Stat Card. For each game thereafter that you choose not to take the new 'Mech but continue to use the old one, the cost of the new 'Mech drops by 10 Experience Points.

Note: Ammo still starts to explode at 28 Heat Points. If the Shutdown number is less than 28, ammo will never explode.

(Mech Repair)—After any battle the surviving 'Mech may salvage parts from defeated 'Mechs and either use them to repair their own damage, or stockpile them for future use. Parts are identified on the Critical Damage Display as they are hit.

Salvage: After any game you win, you may salvage usable parts of your opponent(s) 'Mech(s). Armor and Heat Sinks are automatically repaired after each game and are not salvageable. Other parts are not salvageable if they have suffered any three Critical Hits or one Critical Hit which states "Do not remove." Note: a part which has suffered damage may still be usable by its original owner (with heavy negative modifiers) although it is not salvageable by anyone else.

Repair: You may replace any part on your 'Mech with the identical salvaged part from any other 'Mech. If the salvaged part has been damaged (by taking one Critical Hit, for instance) you must retain any negative modifiers for that damaged part.

Stockpiles: Keep salvaged parts which are not used to repair your 'Mech in the Stockpile box of your Pilot Card. This is your stockpile and you may use parts from it to repair your 'Mech just like any other salvaged parts. You may trade, give or share any parts in your stockpile with any other player. Damaged parts of your own 'Mech which qualify under the salvage rules, above, may be stockpiled.

AMMUNITION—At the end of each game a 'Mech may reload ammunition, however, only at the end of every third game do you receive a full reload. At the end of all other games you receive a half-reload (round fractions down) for each weapon type. Unused ammunition does not count against amounts received in reloading although the 'Mech may never carry more than its initial full load of ammo. Excess ammunition may be stockpiled.

BAILING OUT—Your pilot may eject from his 'Mech during step 7) of any turn in the game. Simply announce, “Bailing out!” The game ends immediately, your opponent wins, but your pilot automatically survives (although without a 'Mech.)

If your pilot does not eject in step 7), he may be killed in step 8) or 9) as follows: If the 'Mech’s armor is reduced in step 8) to −5 or worse, or if the Critical Hit in step 9) is “Pilot Killed,” the pilot automatically dies. You must start a new pilot in a new 'Mech next game with no modifications to any of his skills.

A pilot who bails out starts the next game with all his personal skill modifiers and Experience. He receives a replacement 'Mech of the same tonnage with −3 to all its maneuvers. He may upgrade the 'Mech by spending 50 Experience points for each 1 point modifier increase per category, or by using parts from his stockpile.

NOTE: When you do a move which changes the range between you and your opponent, you may not see the result you expected to see. This is because some maneuvers exist only at certain ranges. The results you get will be the closest comparable in terms of restrictions, damage, etc.

System Designed by: Alfred Leonard
Developed by: Dennis Greci, Karl Hiesterman and James Rosinus
Character Designed by: Karl Hiesterman
Illustrations by: Doug Shuler
Rules and Editing: Dennis Greci, James Rosinus
