Settle In, Polie

I heard you did a summer at Mactown. That’s cool. If McMurdo is like a really out-of-the-way American small town, South Pole Station is like a broom closet on the moon.

That C-130 flying away? Wave goodbye because that was it, the end, civilization is flying away with it and darkness is about to fall like a frozen fucking hammer. We are officially alone. There are 49 other faces here and maybe you love ‘em, maybe you hate ‘em, but for the next six months they are all the faces you are seeing. So settle in, Polie.

We’re standing on 2850 meters of solid ice. The warmest it has ever been here, in the history of ever, is negative 13.6 C. You don’t want to know how cold it can get. You probably wouldn’t believe me if I told you. Even though it is dry as a desert, the wind is always blowing and sometimes that means whiteouts for days and always that means big fucking snow drifts, snow that whips across maybe a thousand kilometers of flat, featureless nothing. Snow we have to keep shoveling or eventually it’d bury us and we’d just disappear. Let that sink in.

Anyway, we’re watching The Thing tonight in the gym, both versions back to back, so stop by if you’ve got any liquor.

Movie Night

1 CONTRABAND
- Two joints of New Zealand dope
- Iridium satphone, usable when an old satellite dips above the horizon
- Missing AED, cannibalized and repurposed
- “We fished this out of the old Rod Well sewage outfall bulb.”
- Pills, stolen from the emergency medical cache
- Enormous bale of New Zealand dope

2 OFFICIAL
- The only remaining tape backup of data showing the signature of sterile neutrinos from the IceCube experiment.³
- Next Monday’s House Mouse schedule - who cleans toilets, who shovels berthing hall emergency exits, who “tidies lounges”
- 125 acres of unused construction equipment and half-empty milvan containers, waiting on raised berms to be sent north
- Obviously incorrect Hazardous Waste Identification Sheet (HWIS)
- Pharmacy tracking database on the J: drive
- Pri-Max mobile aluminum shredder, never used

3 NECESSARY
- The 50 Mbits/s SPTR relay base station, smashed to bits.
- Dog-eared copy of Robert M. Bramson’s *Coping with Difficult People*

- Rod Well #3, the source of the base’s fresh water.
- Last case of hard liquor (limit one bottle per day, $30 per bottle)
- A “takeout meal” for a sick person

³ A distortion of the energy spectrum of atmospheric neutrinos around 1 trillion electron-volts was observed last year. If this tape isn’t lost or destroyed like the master data was, it will show the first robust experimental evidence of extra dimensions, as predicted by string theory.

“Safety is of utmost concern at South Pole Station. All personnel should be aware of all safety measures practiced including “off limits” areas throughout the station. Particular emphasis is given in and around all work environments. Emergency response procedures are provided to all personnel on station. Each person is required to know these procedures. Make note of all exits throughout the facilities. Be aware of extinguisher placement and usage. Please report observed hazards to the Station Manager. Remember, prevention is of highest priority to ensure a safe living and working environment.”

“The work equipment you are issued is for authorized activities. Due to the nature of the field equipment you have access to, you may be tempted to engage in unauthorized overnight camping trips, skidoo races, or Sunday drives outside of town. You are authorized to use the U.S. government equipment issued to you only to accomplish your approved work.”

“A limited amount of alcohol is available for purchase at the three stations. Alcohol is not available on the ships. Even during off-duty hours, events may require swift, intelligent action. The ability of a person to deal effectively with a mishap is reduced if he or she is intoxicated. The NSF will not tolerate abuse of alcohol or unauthorized use of controlled substances. With reasonable cause, testing for alcohol may be conducted while an employee is in active working status. Disciplinary action, up to and including termination, may occur if a person is determined to have any amount of alcohol in their system while on the job. Existing grants are subject to revocation in the event of substance abuse. Persons under the influence of alcohol or other controlled substances will not be allowed to board program aircraft or ships.”
“U.S. Criminal Jurisdiction Public Law 98-473, the Comprehensive Crime Control Act of 1984 (Part H, chapter XII; 18 USC 7), extends Special Maritime and Territorial Jurisdiction to cover offenses committed by or against U.S. nationals in areas not under the jurisdiction of other states. Since, in accordance with provisions of the Antarctic Treaty, the United States does not recognize territorial claims in Antarctica, this law establishes that persons can be prosecuted in a federal court for violation of U.S. criminal law in the Antarctic.”
